Band Name Generator

Instructions

1. Create a greeting for your program.

2. Input the city that the users grew up in.

3. Input the name of a pet that the users have or want.

4. Print combined name of their city and pet and show them their band name.

Example Input

```
Welcome to the Band Name Generator.
What's the name of the city you grew up in?
Jeju
What's your pet's name?
Doggies
```

Example Output

```
Your band name could be Jeju Doggies
```

Hint

You might have to do some Googling.

How to allow user input in Python?
